PROJECTS

Academic Projects

Football game in java

A scene of two players playing a football game from sunrise till sunset.
Included oop concepts i.e., inheritance, encapsulation, and polymorphism for game logic
Java's built-in graphics libraries were used to add special effects to the scene.

Hangman game in java

Accepts a letter guess from the player and checks if the letter is in the randomly generated word.

Amusement Park ride management system in MS-SQL

A database-driven system that allows park managers to manage and monitor the rides in the park. It includes features such as ride scheduling, ride usage and real time monitoring of ride performance.

Personal Project

Gym website using Html & Css

A static website providing information about the gym's services, facilities and pricing. It also asks user's information for membership in gym
